

TEST_CASE

BNO08xTestHelper::calibrated
_gyro_data_is_new

```
graph LR; TC1[TEST_CASE] --> BNO[BNO08xTestHelper::calibrated _gyro_data_is_new]; TC2[TEST_CASE] --> BNO;
```

The diagram illustrates a test setup where two separate test cases, both labeled 'TEST_CASE', are used to verify the state of a BNO08xTestHelper object. Specifically, they are testing the 'calibrated' and '_gyro_data_is_new' attributes. The test cases are represented by white boxes on the left, and the target state is represented by a gray box on the right. Blue arrows indicate the flow from each test case to the target state.
